Rooftop Kit

This kit is perfect for use on rooftops in conjunction with a rooftop lifeline system. The Kern Mantle static rope has an typical breaking strength of 34kN, the Locker (fall arrester) conforms to EN 358 as well as EN 353-2 . The connector conforms to SANS 50362, and the single lanyard has a shock absorbing pack which conforms to EN 355 for extra peace of mind in case a fall occurs. The kit enables the worker to move freely whilst conducting work on a rooftop. It is advisable to use this kit with the proper training and or proper knowledge of working at heights or on rooftops safety.
