Rope Access Kit

The rope access kit consist of all the standard and crucial components for any rope work. The Harness is comfortable and padded on the shoulders for less friction. The kit comes complete with a 100m length of Kern Mantle 11mm Static rope, but the amount of rope can be changed, should you need more ...

Each kit gets issued a unique serial number which makes traceability easy as well control over care and inspection.

All the components in the kit conforms to the necessary standards; it is however advisable to get the correct training before the kit is used as rope work can result in fatal injury if not done properly.

Rope: SANS 51891 (CE Approved)
 Harness: SANS EN 50361, 50358, 50813
 Anchor Sling: SANS EN 50566
